The amazing "Library Magic Trick" from a2magic.com

Instructions: Begin by cutting out the cards along the dotted lines on back. Lay out the cards into 3 rows of 3 in the following order: *Top row - Book Store, Movies, Newsstand. Middle row - Museum, Library, Video Store. Bottom row - Theater, Music Store, Computers.* The small numbers 1-9 in the bottom right hand corner of each card will make remembering the set-up easy. Place the prediction/instruction cards in order (1-4) from top to bottom. Have a coin available to be used as a marker.

Presentation: Begin by saying, "We're going on a little mind-reading adventure. I'm going to read your mind FIVE times and then help you discover the best value on the planet. Here are 9 of my favorite places to visit..." Point them out as you say, "...The Book Store, the Movies, the Newsstand, the Museum, the Library, the Video Store, the Theater, the Music Store and anyplace that has Computers." Show prediction cards as you say, "Here are my predictions. I'll read the instructions, you follow the directions, and together we'll see how many predictions we get correct."

1. Read instructions for prediction #1 out loud, and have your friend follow the directions. Turn the card over, and read your prediction. Since they will not be on the Newsstand or Theater cards, move those cards aside.

2. Read instructions for prediction #2. After your friend moves to their next location, read the prediction on the other side, and move the Video Store and Museum cards to the side.
